Safe and gentle enough for children and infants

Helps you breathe better. Soothes your dry, congested nose with Ayr Saline Nasal Drops. Ayr Drops is effective in restoring moisture to nasal membranes affected by dryness due to climate, respiratory infections, travel, oxygen therapy, overuse of nasal decongestants, and hormonal changes caused by pregnancy. Ayr Drops also aids in eliminating congestion by washing away mucus and allergens from the nose and sinuses. This soothing, non-irritating solution is formulated to be compatible with nasal membranes to prevent the stinging, burning and irritation of delicate nasal tissue that some other sprays and drops may cause. Ayr Drops contain 0.65% sodium chloride buffered to a neutral pH.

INGREDIENTS

A buffered isotonic solution containing sodium chloride 0.65% adjusted to the proper tonicity and pH with monobasic potassium phosphate/sodium hydroxide buffer in deionized water. Also contains the non-irritating antibacterial and antifungal preservatives, disodium EDTA and benzalkonium chloride.

DIRECTIONS

Tilt head back, apply 2 to 6 drops in each nostril as often as needed, or as directed by your doctor.

USES

Ayr Drops moisturizes nasal passages relieving dry, crusty and inflamed nasal membranes; useful as a nasal wash for sinuses, allergies and colds. Safe and gentle enough for babies. Doctor recommended.

PRECAUTIONS

This bottle is not designed to spray. If tip touches nose, rinse with hot water before replacing cap. Use of bottle by more than one person may spread infection.

AVAILABILITY

Ayr Saline Nasal Drops is available in 50 mL bottles.
